Patient Implant Card

Σ GRAFT BIOMATERIALS **SigmaGraft**

Purpose

The purpose of the Patient Implant Card is to inform patients about implantable products they have received, providing an easy access to all relevant information related to the device which the patients have been implanted with. In case of emergencies, it enables patients to inform the clinical staffs or first responders about any specific special cares they might need.

Background

In accordance with regulations, SigmaGraft, Inc. as the legal manufacturer provides the Patient Implant Card together with its implantable devices. The card must be filled with the required information by the healthcare institution or provider and handed to the patient. The card includes name of the patient, date of implantation, name and address of the implanting healthcare institution or provider, the information of the manufacturer of the medical device, and the information of the implanted device.

Below is a list of symbols used on the Patient Implant Card:

| SYMBOL	DESCRIPTION
👤?	Patient Name and Surname or Patient ID
31	Date of implantation
🧑‍⚕️	Name and address of implanting healthcare institution
💻	Patient information website
MD	Medical device
🏭	Manufacturer's name, address and website
REF	Model of the device
LOT	Indicates the manufacturer's lot code for identification purposes
⧗	Indicates the date after which the medical device is not to be used

Instructions

The following items on the Patient Implant Card must be filled by the healthcare institution/provider:

1 The name and surname of the patient or patient ID

2 Date of implantation

3 The name and address of implanting healthcare institution/provider that performed the implantation

4 Information about the medical device
(This information is indicated on the labels adhered to the device's sterile packaging. Detach one and place it onto the designated field on the Patient Implant Card.)

Once the Patient Implant Card has been filled out completely, <u>it must be provided to the patient</u>.
